SMART LIGHTING CONTROL

Lighting ICM captures the essence of smart lighting control by providing remote control via the Internet as well as in home access through a touchpad, PC or PDA. Lighting ICM allows you to modify individual zones or scenes anywhere in the home – even while you're away. From creating a well-lit path, to turning on lights when there is a break-in or fire, Lighting ICM offers simple and flexible possibilities for your home.

CONVENIENCE

Why leave the living room couch to turn off lights in the backyard or upstairs? Monitor and control your entire lighting system with the click of a button. Turn lights on by opening a door. Flip a single switch to turn all lights off at bedtime. Turn on lights from the airport with your PDA, ensuring that you return to a safe and well-lit home.

GET A LIGHTING SYSTEM AND A GRANITE COUNTERTOP

Enjoy all the benefits of a custom lighting system – without spending tens of thousands of dollars. Lighting ICM offers all the features of an expensive lighting system at a fraction of the cost, delivering comfort, convenience and elegance to your home.
